**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yamada (5,318,393). Yamada discloses a tap having a screw part including a bevel lead (3) having chamfers (7) provided from a cutting edge (5b) along ridgelines of a crest face of ridge (5) and a following flank (5a) (column 3, lines 5-14). Yamada discloses chamfers (7,8,21) of differing shape adjacent a crest face of ridges (5,6,20).

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Japan (57-189735) (cited by applicant). 57-189735 discloses chamfers (8,9) adjacent crest face (4) in figures 5,6,7a and 7b.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada (5,318,393) in view of Henderer et al. (7,147,413). Yamada does not disclose a hardened steel, coated tap with a concentricity tolerance. Henderer teaches (column

3, lines 30-35 and column 4, lines 55-60) that it is known to grind a metal carbide (column 3, lines 15-22) tap having a coating (column 4, lines 4-10) to a concentricity tolerance. It would have been obvious to one skilled in the art at the time of invention to grind the tap of Yamada as taught by Henderer to a concentricity specification in order to reduce runout during tapping.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
